SUMMARY

I am a highly motivated Undergraduate with a strong foundation in full-stack web development, object-oriented programming, and database management etc.

EXPERIENCE

Software Engineer, University of Ruhuna – Project Work, Matara

Aug 2022 — Aug 2025

- Developed a Banquet and Catering Management System for a banquet hall and catering business in Piliyandala.
- Built a Library Management System user interface with HTML and CSS to manage lending, returns, and member records.
- Created a Bus Timer Application in Java to provide estimated bus arrival times and schedule management.
- Developed Techmis(sample) in Java to handle academic and administrative data.
- Designed a Chat Application in Java enabling real-time communication between multiple users.
- Built an Inventory Management System to track stock levels, suppliers, and restocking alerts.

Software Engineer, Independent – Project Work, Kalutara

Dec 2023

- Built a Recipe Finder Web App using React.js and public APIs for searching, filtering, and viewing recipes.
- Developed an English Quiz Web App with real-time scoring and interactive multiple-choice questions.
- Designed a POS System for a Juice Bar to manage orders, billing, and inventory updates.
- Developed the FOT Canteen Project during *Hacktrail 2.0*, focusing on digital solutions for canteen management.
- Built Lankanjobs.com, a full-stack Job Platform Web Application for job postings, applications, and user management
